* Disclaimer: featured Apatar users may use connectors other than GoldMine and Salesforce. See page 2 for a partial list of Apatar connectors.

Overview

Apatar solution for GoldMine to Salesforce history migration is a turn-key datamap created for easy migration of on-premises GoldMine history to on-demand Salesforce. It was designed for business users, so the process of setting up the migration does not require technical skills.

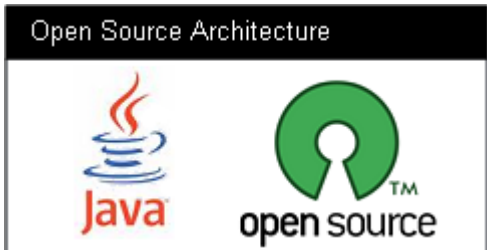

PREBUILT INTEGRATION		
GoldMine	↔	Salesforce
History	↔	Activity History (tasks)

Apatar solution for GoldMine to Salesforce History Migration allows migrating GoldMine contacts filed emails, calendar events, invitations and other activities to Salesforce activity history linking the activities to the right contacts. The solution is designed to migrate not only subjects and notes, but also activity codes and results. Replacements set up in the solution will help you replace your GoldMine users with related Salesforce users to avoid loss of data or its quality.

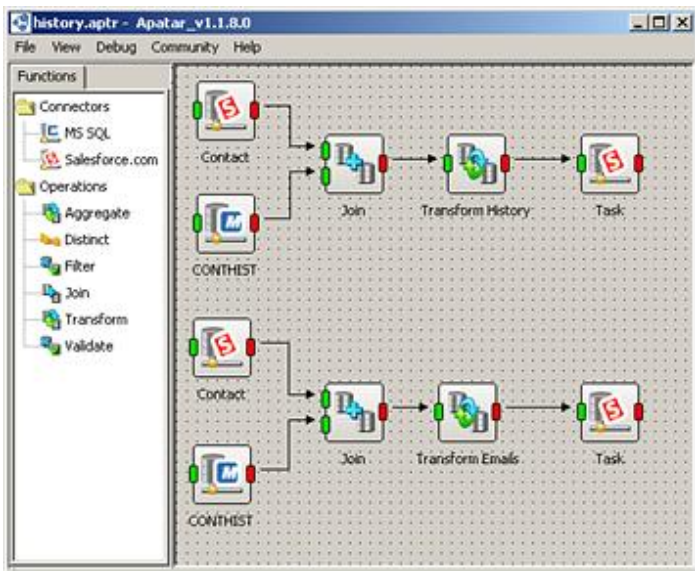

Benefits

- Reduce Total Cost of Ownership
- Shorten implementation time
